

SUBSCRIPTION FORM

PASSIVE-DETECTORS', IN-FIELD, RADON-IN-AIR INTERCOMPARISON **LURISIA SPA, CUNEO, ITALY**

1. General information

Laboratory name	
Reference person	
Telephone	
e-mail	
e-mail 2 (optional)	
Full address	
VAT number	

2. Information to be included in the "Final report"

Identification code or name of device (for each set)	
---	--

3. Type of detector

Detector	
Holder	
Reader	
Sensitive area dimensions	
Other useful information	

4. Additional information needed for analysis:

System accreditation	
Calibration method (frequency, n° exposure, ..)	
Reference standards	
Additional notes on detector etching and data treatment (pre and post- etch procedures included)	
Bibliographical notes	

5. Diagram

<p>Please insert some detector's photographs and drawings, with dimensions and specific positioning indications (if any)</p>	<p><u>Please note that, if no specific positioning indication is provided, the Organising Committee cannot be held responsible for incorrect detector positioning.</u></p>
---	---

6. Terms and conditions for participation:

1. The Italian Radiation Protection Association (AIRP) and the Organising Committee Members decline responsibilities for any damage or loss during the intercomparison.
2. Laboratories must provide 20 devices for each detector set, following instructions that will be sent after the end of the subscription period. Any device not conforming to preparation instructions will be rejected.
3. The Organising Committee will take care of device shipping after exposure. Please note that all inbound shipping costs to Italy (including custom expenses for non-EU participants) must be borne by the Laboratory.
4. Participation fee: 200 € (plus VAT if applicable) for each detector set, to be paid before June, 15th. No reimbursement is foreseen, except in the case of cancellation.
5. Intercomparison results will be treated as confidential by the Organising Committee and the identification number will not be made public. Results, in anonymised form, will be presented in a specific session during a congress which will be held in LURISIA in 2015. Aggregate results, in anonymous form may give rise to a publication and/or a report, that will be sent to all intercomparison participants.

I accept terms and conditions for participation to "Passive detectors', in-field, radon-in-air intercomparison, Lurisia, Cuneo, Italy":
